

Suggested Books

Most of these are on reserve at the library.

- ed. Apanasov, Neumann, Reid, and Siebenmann, **Topology '90**
- Bridson and Haefliger, **Metric Spaces of Non-positive Curvature**
- Francis Bonahon, **Low-dimensional Topology: From Euclidean Surfaces to Hyperbolic Knots**
- M. Davis, **The Geometry and Topology of Coxeter Groups**
- Michael Kapovich, **Hyperbolic Manifolds and Discrete Groups**
- S. Katok, **Fuchsian Groups**
- Olli Lehto, **Univalent Functions and Teichmüller Space**
- C. Maclachlan and A. W. Reid, **The Arithmetic of Hyperbolic 3-manifolds**
- Bernard Maskit, **Kleinian Groups**
- Albert Marden, **Outer Circles: An Introduction to Hyperbolic 3-manifolds**
- Ratcliffe, **Foundations of Hyperbolic Manifolds**
- William Thurston, **Three-Dimensional Geometry and Topology**
- E. B. Vinberg, **Geometry II**
